

| HEADLIGHT OUTPUT BOOSTER/CONTROLLER |

By using a dash mounted controller, the Gee-system allows the driver to adjust headlight output up to 200%. A low/high switch and a separate intensity knob allow the driver to fine tune light output as needed. When the vehicle comes to a stop, the unit will automatically switch to the low setting.

- Works with low or high wattage bulbs
- 100% water sealed housings
- Independent left and right circuits
- Heavy duty cast construction
- Universal for all 12 volt vehicles
- Easy installation

Save Mode (70%) saves power and prolongs bulb life for Bright—Super Bright Mode (100-200%) performance operating range
